Optimal scheduling for tasks with stochastic runtimes

A project submitted in partial satisfaction
of the requirements for the degree of

Master of Science

in

Statistics and Applied Mathematics

by

Niranjan Vissa

June 2015

The Project of Niranjan Vissa

is approved:

Professor David Draper

ACKNOWLEDGMENTS

This master's project could not have been written without the help of Prof. David Draper who gave me the guidance, encouragement, and expertise needed for the advancement of my education.

Chapter 1

Introduction

This is the Intro

Chapter 2

Single processor case

This is chapter 1

2.1 Methods

This is section 1.1

2.2 Results

This is section 1.2

2.2.1 Part 1

This is section 1.2.1

2.2.2 Part 2

This is section 1.2.2

2.3 Discussion

This is section 1.3

Chapter 3

Multiprocessor case

This is chapter 2

3.1 Methods

This is section 2.1

3.2 Results

This is section 2.2

3.3 Discussion

This is section 2.3

Chapter 4

Conclusions and future work

This is chapter 3

Appendix: R code for obtaining the results in Chapters 2 and 3
